

NGOC HUI

510.750.6699 | nhui2@horizon.csueastbay.edu
Union City, CA | jade-hui-portfolio.vercel.app | linkedin.com/in/ngoc-hui

EDUCATION

California State University, East Bay

B.S. in Computer Science

Hayward, California

Expected Graduation: May 2027

- Cumulative GPA: 3.7 | Department GPA: 4.00
- Relevant Coursework: Programming in Python and C++, Discrete Mathematics, Data Structures & Algorithms, Programming Language Concepts, Computer Architecture, Statistics and Probability
- Upcoming Coursework (Fall 2026): Software Engineering, Analysis of Algorithms, Database Systems, Mobile Programming, Artificial Intelligence

SKILLS

- Programming Languages: Python, C++, JavaScript, HTML/CSS
- Frameworks & Libraries: React, Node.js, Express.js, Flask, Prisma, Tailwind CSS
- AI & APIs: OpenAI API, Ollama, REST APIs
- Tools & Platforms: Git, GitHub, Docker, Railway, Vercel, Twilio, Figma

PROJECTS

Jade Journal

AI-Powered Journaling App

Jun 2026 - Present

- Built a full-stack journaling app with AI-assisted writing, insight extraction, and monthly/yearly reflections using the OpenAI API, with deterministic fallback responses so the app degrades gracefully without an API key.
- Developed the application using React, TypeScript, Node.js, Express, PostgreSQL, and Prisma, and deployed it to Railway with Docker and Prisma-managed database migrations.
- Iteratively shipped new features and improvements using conventional commits, testing and resolving data integrity and UI/UX issues including stale autosave writes, timeline rendering inconsistencies, search functionality, and responsive layouts.

Personalized Birthday Card

Interactive Card Builder

Jun 2025 - Present

- Built an interactive card builder that enables users to create personalized digital birthday cards with customizable messages, photos, and interactive experiences for recipients.
- Diagnosed and fixed an audio-overlap bug in a multi-phase animation sequence, adding playback cleanup across replay, tab-visibility, and page-unload events.
- Leveraged Claude and Codex as AI development assistants to rapidly prototype features, debug issues, and accelerate development while reviewing, testing, and refining the implementation.
- Deployed the application on Vercel and managed version control using Git and GitHub.

Pretty Good AI Voice Bot Tester

AI Voice Bot Testing Platform

Mar 2026 - Apr 2026

- Built an automated AI voice bot testing platform that simulates realistic patient phone calls to evaluate conversational AI agents through multi-turn interactions and edge-case scenarios.
- Integrated OpenAI, Twilio, and Flask to generate dynamic conversations, place real phone calls, maintain conversation history, and automatically save transcripts for analysis.
- Automated conversation testing by reproducing realistic patient interactions, capturing transcripts, and exposing conversational failures to support faster debugging and continuous improvement of AI voice agents.
