Union City, CA | github.com/jadecodelab | linkedin.com/in/ngoc-hui

EDUCATION

California State University, East Bay

B.S. in Computer Science

Hayward, California

Expected Graduation: May 2027

- Cumulative GPA: 3.7 | Department GPA: 4.00
- Relevant Coursework: Programming in Python and C++, Discrete Mathematics, Data Structure & Algorithms, Programming Language Concepts, Computer Architecture, Statistics and Probability

SKILLS

- Programming Languages: Python, C++, JavaScript, HTML/CSS
- Frameworks: Node.js, Express.js, Flask
- Tools: Git, GitHub, Figma, Render

PROJECTS

Flashcards Generator

Personal Project

Apr 2026

- Built and deployed a full-stack app that generates flashcards from pasted or uploaded notes using OpenAI.
- Developed a Node.js and Express backend to securely manage API requests, handle file uploads, and extract text from .docx documents for processing.
- Created a responsive front end in HTML, CSS, and JavaScript with review, shuffle, keyboard navigation, and browser-based saved deck management using localStorage.

AI Voice Bot Testing System

Software Engineer

Mar 2026 – Apr 2026

- Built an automated voice bot that simulates patient calls to test an AI healthcare agent using Twilio and Flask
- Designed scenario-based tests to evaluate system behavior including edge cases
- Generated and analyzed 10+ test calls to identify bugs in AI agent responses and workflows

AI Future Hackathon

Front-End Developer

Laney College

Jun 2025

- Designed user-centered mobile app mockups in Figma for a ride application tailored to elderly users, prioritizing simplicity and accessibility.
- Built a front-end prototype under a tight deadline, translating designs into a functional UI within a 6-hour development window.
- Presented the solution to judges and peers, explaining user flow, design decisions, and technical approach.

Delta Chi Website

Web Designer

CSU East Bay

Oct 2024 – Apr 2025

- Designed a website for Delta Chi fraternity at CSU East Bay serving 40+ members, focusing on member and admin login functionality.
- Conducted user research through surveys and interviews with 5 fraternity members to identify needs and brand standards.
- Delivered responsive wireframes and high-fidelity mockups in Figma, reducing developer revision time by approximately 30% and improving design consistency.
- Collaborated with a cross-functional team of 6 (product manager, frontend and backend developers) to incorporate feedback and align design decisions with technical constraints.
